“For Immediate Release”

Launching of Nutrislice Web Menus

Subject: Palm Beach County School Food Service Department unveiled its new website earlier this week! The website is designed to provide parents and students with important information about the school meals program.

As part of the redesign, the School Food Service Department is excited to announce a new partnership with Nutrislice. Through Nutrislice, the District’s menus will be published online, allowing users to receive menu information as well as have access to specific information about each item that is being offered including photos, descriptions, nutritional and allergen information. In addition, parents and students will have the opportunity to view the menus specific to their school(s). Translated menus and printable pdf menus will also be available through this website.

The School Food Service Department encourages you to access the new online menus page by visiting www.palmbeachschools.org/sfs. From there, click on “District Menus” and then “View Menus”. This will take the user directly into Nutrislice where they will select their school and type of menu to view. In addition to the online website, a free iPhone and Android school menus app (School Lunch by Nutrislice) is available which can be downloaded in the Apple App Store or Android Market Place.

Parents and students now have multiple ways to view and get important information regarding the district’s menus. So, whether you would prefer to print the menu or get your information on-the-go we now menu information at your fingertips.
