**SUBJECT: SCHOOL FOOD SERVICE - HIGH SCHOOL RE-ENGINEERING PROGRAM**

School Food Service (SFS), with the cooperation of the FDACS – Office of Food, Nutrition and Wellness, has reinvented the way high school students perceive and receive their meals.

The High School Reengineering Program transforms the physical facility, provides adequate time for students to eat, improves customer service, increases the number of nutritious food offerings, and enhances the overall dining experience. As a result, students look forward to this time to nutritionally recharge for improved physical and mental well-being; supporting the District's goal of improving academic performance.

Based on the success of the program, SFS is accepting requests from potential Re-engineering schools. Santaluces Community High School is opening their remodeled cafeteria in SY15-16, followed by Royal Palm Beach High School in SY16-17. If you are interested in becoming the SY17-18 high school, please express your interest for consideration by March 31, 2015.

For more information about the program, please visit <http://www.palmbeachschools.org/sfs/reengineering.asp> or contact Heidi Schwab to arrange a site visit
