Rating Survey Detail								
<p>Company Name: The Weitz Company, Inc.</p> <p>Cumulative Average Rating: 9.70</p> <p>Number of Surveys Taken: 4</p>								
<p>RatingSource.Com researches and surveys Owners and/or Owners' Project Managers of recently completed projects performed by the Contractor/Construction Manager within the last five years.</p> <p>Research is provided by submitting a questionnaire to each Owner containing the criteria shown on the far left column. RatingSource requests each Owner to score the Contractor's performance for each specified project from a 1 (worst) to 10 (best) scale (see below) covering each criteria. The ratings are averaged for each project from five to ten recent and related projects to achieve the cumulative scores appearing in the third column. The overall rating, which appears at the top of the second column, is determined by averaging all scores from the criteria. All numerical ratings for the criteria are provided by Owners and Project Managers of their respective projects. All ratings are periodically updated as Architectural Firms complete new projects.</p> <p>Research concludes that firms whose scores are in the range of 8 (+/- 1) or greater tend to result in higher levels of success in their projects.</p>								
RATING
