

were also false. One stated report that I was the cause of two employees to quit. Kim Barker was supposedly one of the two employees to quit; however she still works for Jupiter High School. She changed positions to work for night school, which would allow her to work for her boyfriend during the day. The other person was Beth, the person hired to replace Kim. She resigned due to her father's illness. This was relayed by e-mail sent by Joan the Head Secretary to all other secretaries and Assistant Principals. Another reason I was to be reassigned was that I was sharing student information. I strongly deny. Student aides were trained to use computers and taught how to change the screens by Kim Barker. She allowed them to use the computer at her own personal workstation. Students were not to have access to staff computers. I locked my computer religiously to prevent student from gaining access to it. Joan accused me of allowing a student to see confidential information when she was standing right next to this student. She did not address the problem, which supposedly was a concern of hers. She reprimanded me at a later time via e-mail about the situation that could have been remedied on the spot. I question her about confidential information about me that was sent with a student without an envelope. It contained my full name, address, phone number, social security number and employee id. Joan never responded. When I informed Dr. Nessmith about this she said that "Confidential is just a word that they through around." even though the information was not considered confidential. She actually stated that anyone could get your social security number. I was never told why I was a disruption to the school although this was one of the reasons I was given a reassignment.

These allegations are false. It amazes me that the district would allow this to go so far. As I said before, I am a very hard worker and strive for the best. It's beyond my imagination that I could be terminated based on allegations I have not been able to address. I have documented all actions that I considered to be discriminatory. I am enclosing copies of the documents that confirm actions taken against me.
