For questions 3 – 7, provide your best estimate. Exact figures are not expected.

3. What percent of the mentored students improved their **letter grades**? 35%
4. What percent of the mentored students improved their **school behavior**? 73%
5. What percent of the mentored students improved their **school preparedness (homework)**? 52%
6. What percent of the mentored students improved their **school attendance**? 51%
7. What percent of the mentored students improved their **general attitude**? 59%

8. Do you collect parent feedback of their satisfaction with the program?

 √ Yes No

9. What academic activities are included for students? Please list (e.g., Power Hour). Academic activities this year included a "C to A" program intended to help students improve their academic performance with the aid of computer software, a Whiz Kids Club with the goal of instilling in its members strong leadership skills and an increased understanding of computer technology, and Power Hour, State Education Day, Goals for Growth, Smart Moves, Smart Kids, Job Ready, and Ultimate Journey programs.

10. What suggestions do you have for improving either your operations or the state DOE project application process?

The State DOE project has been tremendously helpful in enabling the Boys & Girls Clubs of Palm Beach County to improve its educational programming for its youth. The collaborative with the School Board in the application process, while not glitch-free, has also been a positive means of creating a better understanding of the support that the two groups can provide each other.
