## SUBJECT: FY17 RESULTS OF THE PARENT \& STUDENT VERSIONS OF THE SCHOOL EFFECTIVENESS QUESTIONNAIRE (SEQ)

The District administered the School Effectiveness Questionnaire (SEQ) from January to February 2017. The SEQ measures perceptions regarding the effectiveness of our District schools. ${ }^{1}$ The SEQ provides important information to schools and the District to develop and sustain a Positive and Supportive School Climate, which is a central theme in the Strategic Plan. In addition, these results will inform the Strategic Initiative of Single School Culture 2.0 on systems for academics, behavior and climate within schools.
The categories for the SEQ were developed from using factor analysis and a review of national school climate surveys. ${ }^{2}$ The categories in the parent version of the SEQ are: School Climate (16 items), Diverse Community (4 items), High Expectations (4 items), Individual Concerns (4 items), and Parental Involvement ( 9 items). The categories in the student version of the SEQ are: School Climate ( 19 items), Challenging Assignment ( 5 items), Diverse Community (3 items), Parental Involvement (6 items), Individual Concerns (5 items), and College Preparation (7 items), for middle school and high school students only.
The following analysis and tables are provided for the Parent and Student SEQ for FY15 through FY17. Response rates for both Parent and Student versions are provided in Table 1. Tables 2 through 5 report the percent of positive Parent and Student responses overall and to each of the categories of the SEQ for the District and by School Level, respectively.

## SEQ Response Rates from FY15 to FY17:

- Parent response rates remained similar, but critically low for the District and at most schools o Less than $20 \%$ of eligible parents provided feedback, therefore, caution should be used when interpreting results
o Rates were highest at Elementary (27\%), followed by Middle (18\%), then High schools (11\%) o 18 Elementary, 10 Middle and 8 High schools had less than 10\% parent participation
- Student response rates remained similar for the District at High schools, decreased in Elementary schools, while Middle school response rates increased by 4 percentage points.

| High | $12 \%$ | $12 \%$ | $11 \%$ | $41 \%$ | $43 \%$ | $42 \%$ |

* Due to limited response rate, parent version SEQ results should be viewed with caution. ${ }^{(s-)}$ Negative significant difference from prior year. ${ }^{(s+)}$ Positive significant difference from prior year.

Tables 2 and 3 below display the percent of positive Parent responses overall and to each of the categories of the SEQ for the District and by School Level, respectively. As noted, parent responses should be viewed with caution due to the limited response rate.

Table 2: District-wide Parent Positive Responses Overall and by SEQ Categories.

${ }^{(s+)}$ Positive significant difference from prior year.
While a limited sample, the percent of parents responding positively to the SEQ overall and to each category of items has increased from FY15 to FY17. Despite increasing nearly seven percentage points, items relating to the school's response to individual parent concerns continues to lag the other SEQ categories.

${ }^{(s+)}$ Positive significant difference from prior year.
The trend seen District-wide was also see across school levels, however, Elementary Parents expressed the highest positive responses followed by Middle and then High School. In addition, the positive responses to items relating to Individual Concerns and Parent Involvement were substantially lower at the high school level.

Tables 4 and 5 display the percent of positive Student responses overall and for each of the categories of the SEQ for the District and by School Level.

${ }^{(s-)}$ Negative significant difference from prior year. ${ }^{(s+)}$ Positive significant difference from prior year.
The overall percent of positive Student responses to the SEQ increased by three percentage points from FY15 to FY17. Significant increases were also seen in positive responses to items relating to School Climate, Diverse Community, and College Preparation. Conversely, the percent of positive student responses to the items about Individual Concerns significantly decreased.

${ }^{(s-)}$ Negative significant difference from prior year. ${ }^{(s+)}$ Positive significant difference from prior year.
Positive Responses from Elementary (Grade 5) students significantly increased Overall and each of the categories with the exception of Challenging Assignments and Individual Concerns. Middle and High School positive student responses increased Overall and for the Diverse Community, and College Preparation categories and decreased for Individual Concerns. Middle School responses remained stable for School Climate, Parental Involvement, and Challenging Assignments while High Schools declined in these areas. Finally, positive responses to the Parental Involvement items significantly decreased for High Schools.

Attached are Tables $6 a-6 c$ which show the response rates and percent positive responses for the FY17 parent version of the SEQ for each school by category. Table 6d provides percent positive responses for the FY15 through FY17 parent versions of the SEQ by item.

Attached are Tables 7a-7c which show the response rates and percent positive results for the FY17 student version of the SEQ for each school by category. Table 7d provides percent positive responses for the FY15 through FY17 student versions of the SEQ by item.

Categories: $\mathrm{A}=$ School Climate; $\mathrm{B}=$ Challenging Assignments; $\mathrm{C}=$ Diverse Community; $\mathrm{D}=$ Parental Involvement; E=Individual Concerns; $\mathrm{F}=$ College Preparation
For Category E, the percent positive response is a contrary indicator and represents the student's perception where issues are NOT a problem.

[^0]:    ${ }^{1}$ There are two versions of the student SEQ, one for elementary and another for secondary levels. The student elementary version is administered only to Grade 5 students. The student secondary version also exists in order to address levels of readability and for issues like college preparation.
    ${ }^{2}$ Survey items that are highly inter-correlated or loaded more closely together are supposed to measure the same construct or conceptual category. The average of these item responses composed a category score. This allows the categories to have statistical support. Category labels were taken from research literature related to the structure of school climate.

[^1]:    * Schools with response rates of $10 \%$ or less are not reported (NR).

[^2]:    * Schools with response rates of $10 \%$ or less are not reported (NR).
